- To **delete** rows from the database, you must first specify the table name and the value of the first column/attribute of the table, then click the 'Delete' button.
- To **insert** rows into the database, you first enter the table name in the first text field, then the rest of the attributes in the remaining text fields, then press the 'Insert' button. Unused text fields will be ignored during both insertion and deletion.
- To **search** and retrieve particular records in any of the 7 tables, enter the table name in the 'Table Name' textfield, the column name in the 'Attribute: 1' textfield, the value that the desired records should have in that specific column in the 'Attribute: 2' textfield and click the 'Search' button
